

SKIN SURGERY With an already established cult following, QMS Medicosmetics has launched The Skincare Surgery in Knightsbridge, delivering personalised skin care treatments using the exclusive collagen skin regeneration regime developed by renowned cosmetics surgeon and international lecturer Dr med Erich Schulte. The surgery offers a range of groundbreaking treatments to ensure you're looking your best this summer.

All treatments at the surgery are based on the research of Dr Schulte who has designed a ground-breaking technique which allows collagen to penetrate the epidermis of the skin, resulting in a significant improvement in the appearance, quality and elasticity of the skin. While working on severe accident and burn victims in Germany during the 1970s, Dr Schulte researched wound healing and found that upon the introduction of collagen to the skin, scar formation was reduced and skin regenerated. The result of his

research was his Classic Collagen Set – of Exfoliant Fluid, Day Collagen Serum and Night Collagen Serum – launched last year at Selfridges to rave reviews.

The Set improves the structure of the skin, enabling it to be deeply hydrated and revitalised while feeling smoother and more elastic and ultimately reversing the appearance of ageing. Elasticity is improved, reducing the appearance of fine lines and wrinkles. All products are available at the surgery's luxurious in-house store, and they really work!

LA PARFUMERIE

With the summer season shortly upon us, visit Gina Foster's fabulous new hat and fascinator boutique. Her 2010 'La Parfumerie' collection is inspired by scent bottles and fragrances, with each hat named after a perfume that reflects its inspiration. The store also houses her new ready-to-wear collection, as well as couture hats which are made-to-order.
